

SAP FI Configuration Guide

A comprehensive SAP Financial Accounting Configuration & End User Reference for **Group B** – covering G/L, AP, AR, Banking, Cash Journal, Asset Accounting, Controlling and internal orders currency types and TAX across company codes TEC1–TEC5.

CONFIGURATION REFERENCE

END USER GUIDE

Assigned Tasks	Team Member
- G/L Configuration for TEC1 - AP End User for TEC1 - Cash Journal Configuration for TEC1 - Create Controlling Area for TEC1 (Bonos). - Define and assign cost centers and profit centers (Bonos). - Cost Center Accounting for TEC1: - Post Expense Allocations using Primary Cost Elements (Bonos). - Demonstrate Distribution / Assessment Cycles between Cost Centers (Bonos). - Display Cost Center Reports showing Cost Allocations (Bonos). - Asset End User Activities: Create Asset (AS01) & Asset Acquisition (F-90) for TEC1 - Create G/L, AP, AR, Controlling Area, and Cost Centers for TEC2, TEC3, TEC4, and TEC5	Aya Abu elenin El sayed Makhoulouf
- AR End User for TEC1 - AR Configuration for TEC1 - Cash Journal End User for TEC1 - Asset End User for TEC1 - Tax Configuration for TEC1 (Bonos).	Lobna Abd El Aziz
Banking Configuration for TEC1	Khaled Morsy
- G/L End User for TEC1 - AP Configuration for TEC1 - Banking End User for TEC1 - Banking Configuration for TEC2, TEC3, TEC4, and TEC5 - Setup Currency Types for TEC1 (Bonos). - Create One Manufacturing Plant per Company Code for TEC1(Bonos).	Sameh Mohamed
- Asset Configuration for TEC1 - Asset Configuration for TEC2, TEC3, TEC4, and TEC5 - Define and assign internal orders (Bonos).	Mohamed Ahmed Sadik

Enterprise Structure & Company Setup

The foundation of SAP FI begins with defining the enterprise structure – creating the company, company code, and linking them together.

Create Company

Code: **0X15**

Company: GTEC

Company name: Global Tech Industries Ltd

IMG → Enterprise Structure → Definition → Financial Accounting → Define Company

Create Company Code

Code: **0X02**

IMG → Enterprise Structure → Definition → Financial Accounting → Edit/Copy/Delete Company Code → **Company Code: TEC1,TEC2,TEC3,TEC4.TEC5**

Assign Code to Company

Code: **0X16**

IMG → Enterprise Structure → Assignment → Financial Accounting → Assign Company Code to Company

Change view Company Code

Company Code: TEC1 Global Tech Egypt 1 Cairo

Chart of Accounts, Fiscal Year & Document Settings

Chart of Accounts

- **OB13** — Define Chart of Accounts
- **OB62** — Assign Chart of Accounts to Company Code
- **OBD4** — Define Account Groups
- **OB53** — Define Retained Earnings Account - 300000
- **TEC**
("Assets ,Expenses ,Liabilities, Equity, ,Revenues and secondry cost elements.")

Fiscal Year & Posting Periods

- **OB29** — Define Fiscal Year Variant -TC
- **OB37** — Assign Fiscal Year to Company Code
- **OBBO** — Define Posting Period Variant - TC
- **OBBP** — Assign Posting Period Variant to Company Code
- **OB52** — Open and Close Posting Periods

Document Settings

- **OBA7** — Define Document Types
- **FBN1** — Define Number Ranges
- **OBC4/ OBC5**— Field Status Variant & Assignment --
TEC
- **OBA4 / OBA3** — Tolerance Groups
(Vendors/Customers &employee)
- **OBY6** — Global Parameters for Company Cod

Vendor Master Data Configuration

Setting up vendor master data requires defining account groups, number ranges, screen layouts, and Business Partner (BP) integration settings.

Account Groups & Screen Layout

- **OB03** — Define Vendor Account Groups
- **OB23** — Screen Layout per Company Code
- **OB24** — Screen Layout per Activity

Number Ranges

- **XKN1** — Create Vendor Number Ranges
- **OBAS** — Assign Number Ranges to Vendor Account Groups
- **BUCF** — Define Number Range for BP Grouping
- Define Groupings and Assign Number Ranges

BP Integration

- Define BP Role for Direction Vendor → BP
- Define Number Assignment for Direction BP → Vendor

Payments & Reconciliation

- **FS00** — Define Vendor Reconciliation G/L Account
- **OB08** — Maintain Terms of Payment
- **OB09** — Define Installment Payment Terms
- **OBXU** — Define Account for Cash Discount Taken
- **OBXI** — Define Alternative Reconciliation A/C for Down Payment

Vendor

The image shows a laptop displaying the SAP Vendor Master screen. The screen has a sidebar with 'Financial Accounting' and 'Accounts Payable' sections. The main area shows 'Vendor Master' data for Vendor 100000, including Company Code, Account Group, and Payment Terms. A 'Status' indicator shows 'Active'. Below the laptop is a blue mug with 'SAP S/4HANA' text. To the right of the laptop are icons for 'VENDOR', 'INVOICE', and 'PAYMENT'. In the foreground, a book titled 'AP CONFIGURATION IN SAP' is visible. The book cover features a 'TABLE OF CONTENTS' with 15 items, including 'Vendor Account Group', 'Screen Layout per Company Code', 'Define Screen layout per Activity', 'Number Ranges for Vendor Group Account', 'Assign Number Ranges to vendor Account Groups', 'Create Reconciliation G/L Account', 'Define BP Role for Direction Vendor to BP - Link Vendor Groups to BP Role', 'Define Number Range for BP Grouping', 'Define Groupings and Assign Number Ranges', 'Define Number Assignment for Direction BP to Vendor', 'Maintain terms of Payment', 'Define Terms of Payment for Installment Payments', 'Define Account for Cash Discount Taken', 'Define alternative Recon. A/c for Down Payment Vendor', and 'Assign BP with Vendor and Customer Number Range in SAP'. The book also has a tagline 'CONFIGURE TODAY, AUTOMATE TOMORROW.' and icons for 'Standard Configuration', 'Accurate Master Data', 'Strong Controls', and 'Efficient Processes'.

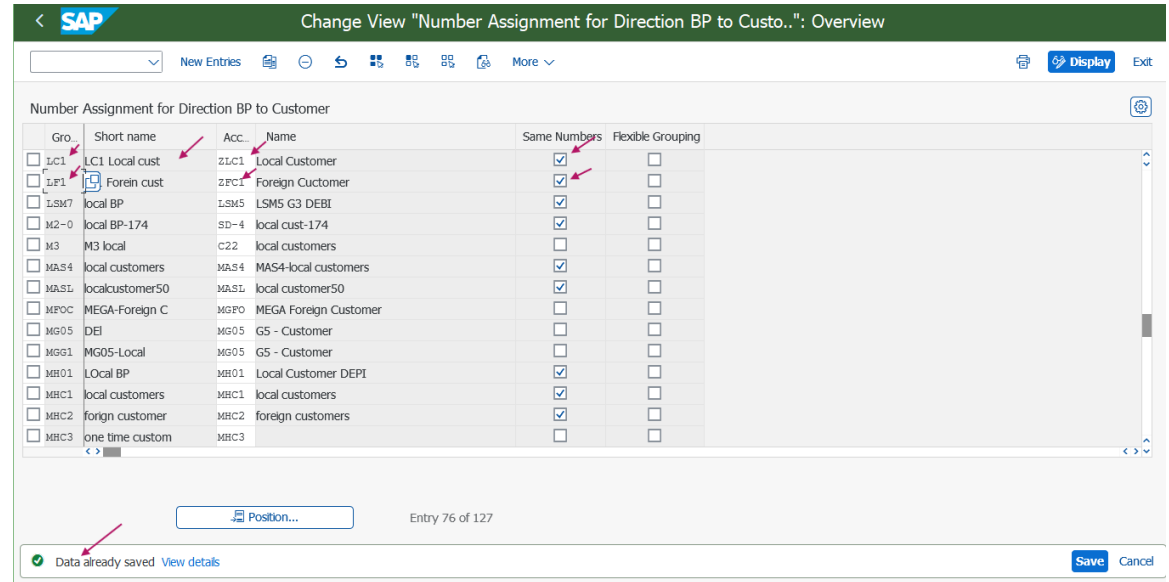

TABLE OF CONTENTS

- 01 Vendor Account Group
- 02 Screen Layout per Company Code
- 03 Define Screen layout per Activity
- 04 Number Ranges for Vendor Group Account
- 05 Assign Number Ranges to vendor Account Groups
- 06 Create Reconciliation G/L Account
- 07 Define BP Role for Direction Vendor to BP - Link Vendor Groups to BP Role
- 08 Define Number Range for BP Grouping
- 09 Define Groupings and Assign Number Ranges
- 10 Define Number Assignment for Direction BP to Vendor
- 11 Maintain terms of Payment
- 12 Define Terms of Payment for Installment Payments
- 13 Define Account for Cash Discount Taken
- 14 Define alternative Recon. A/c for Down Payment Vendor
- 15 Assign BP with Vendor and Customer Number Range in SAP

CONFIGURE TODAY, AUTOMATE TOMORROW.

Configuration

customer

The image shows the SAP Change View 'Number Assignment for Direction BP to Custo..': Overview. The screen displays a table with columns: Gro., Short name, Acc., Name, Same Numbers, and Flexible Grouping. The table lists various customer types and their corresponding account numbers. A red arrow points to the 'Short name' column, and another red arrow points to the 'Same Numbers' column. The table is sorted by 'Short name'.

Gro.	Short name	Acc.	Name	Same Numbers	Flexible Grouping

Customer Master Data Configuration

Customer master data setup mirrors vendor configuration, covering account groups, number ranges, BP role integration, and payment terms.

Account Groups & Number Ranges

- **OBD2** — Define Customer Account Groups
- **XDN1** — Create Customer Number Ranges
- **OBAR** — Assign Number Ranges to Customer Account Groups
- **BUCF** — Define Number Range for BP Grouping

BP Integration

- Define Business Role (BP Role)
- Define BP Role for Direction Customer → BP
- Define Groupings and Assign Number Ranges
- Define Number Assignment for Direction BP → Customer

Payments & Reconciliation

- **FS00** — Define Customer Reconciliation G/L Account
- **OBB8** — Maintain Terms of Payment
- **OBB9** — Define Installment Payment Terms
- **BP** — Assign Payment Terms to Customer Master Data
- **OBXI** — Define Account for Cash Discount Granted

Banking Configuration

Banking configuration in SAP FI enables manual bank statement processing, house bank setup, and G/L account integration for accurate cash management.

Create & Assign Business Transactions

Code: **OT51** — IMG → Financial Accounting → Bank Accounting → Business Transactions → Payment Transactions → Manual Bank

Define Posting Keys & Posting Rules

Code: **OT52** — Define Posting Key and Posting Rules for Manual Bank Statement

Create 4 G/L Master Records

Code: **FS00** — SAP Menu → Accounting → Financial Accounting → General Ledger → Master Records → G/L Accounts → Individual Processing → Centrally

Define Variants for Manual Bank Statement

Code: **OT43** — IMG → Financial Accounting → Bank Accounting → Business Transactions → Payment Transactions → Manual Bank

Create Bank Key, House Bank & Account ID

Code: **FI12** — IMG → Financial Accounting → Bank Accounting → Bank Accounts → Define House Banks

Configuration

Cash Journal Configuration

The Cash Journal in SAP FI records petty cash transactions. Configuration involves creating a dedicated G/L account, defining document types, number ranges, and setting up print parameters.

Assets Configuration – Part 1: Organizational Structures

These steps establish the foundational organizational structures required for Asset Accounting in SAP.

1

Map Leading & Non-Leading Ledgers to Depreciation Areas

Code: OA0B

Path: IMG → Financial Accounting → Asset Accounting → Organizational Structures → Copy Reference Chart of Depreciation/Depreciation Area

2

Assign Chart of Depreciation to Company Code

Code: OA0B

Path: IMG → Financial Accounting → Asset Accounting → Organizational Structures → Assign Depreciation Area to Company Code

3

Account Determination

Code: ANC1

Path: IMG → Financial Accounting → Asset Accounting → Organizational Structures → Asset Class → Specify Account Determination

4

Screen Layout

Code: ANS1

Path: IMG → Financial Accounting → Asset Accounting → Organizational Structures → Asset Class → Create Screen Layout Rules

Assets Configuration – Part 2: Asset Classes & Master Data

Asset Class Setup

Number Range Intervals – Code: AS08

IMG → Asset Accounting → Organizational Structures →
Asset Class → Define Number Range Intervals

Asset Class – Code: OAOA

IMG → Asset Accounting → Organizational Structures →
Asset Class → Define Asset Class

Depreciation Area in Asset Class – Code: OAYZ

IMG → Asset Accounting → General Valuation → Depreciation
Area → Determine Depreciation Area in the Asset Class

Master Data & G/L Integration

Screen Layout for Asset Master – Code: AS11

IMG → Asset Accounting → Master Data → Screen Layout →
Define Screen Layout for Asset Master

Screen Layout for Depreciation Area – Code: AO21

IMG → Asset Accounting → Master Data → Define Screen
Layout for Asset Depreciation Area

Asset G/L Master – Code: FS00

Accounting → Financial Accounting → General Ledger →
Master Records → G/L Accounts → Individual Processing →
Centrally

Technical Clearing Account & Assign G/L Accounts – Code: AO90

IMG → Asset Accounting → Integration with General Ledger
Accounting

Assets Configuration – Part 3: Year-End & Tax Integration

1

Assign Input Tax Indicator

Code: OBCL

IMG → Asset Accounting → Integration With General Ledger Accounting → Assign Input Tax Indicator for Non-Taxable Acquisitions

2

Open Asset Year

Code: FAGLVTR

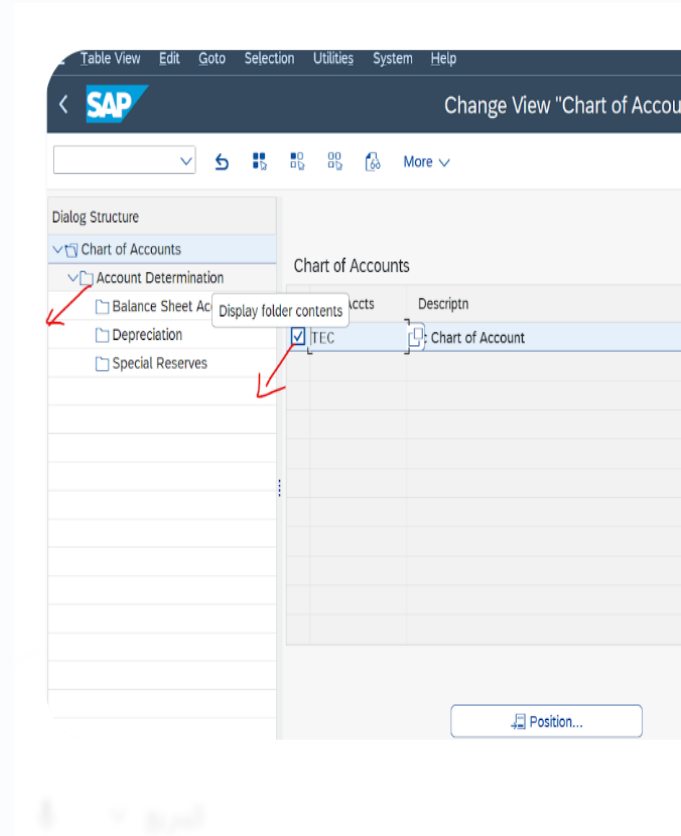

Accounting → Financial Accounting → Fixed Assets → Periodic Processing → Fiscal Year Change → Balance Carryforward → Central FI

3

Balance Carry Forward

Code: FAA_CMP

Accounting → Financial Accounting → Fixed Assets → Periodic Processing → Year-End Closing → FAA_CMP → Execute/Undo

Controlling Configuration

Configure the CO module including Controlling Area setup, Profit Center Accounting, Cost Centers, and Document Splitting.

Maintain Controlling Area

Code: OKKP

SAP Reference IMG → Controlling → General Controlling → Organization → Maintain Controlling Area

Activate Profit Center Accounting

Code: OKE5

SAP Reference IMG → Controlling → Profit Center Accounting → Basic Settings → Maintain Controlling Area Settings

Define Ledger for CO Version

Code: OKEQ

SAP Reference IMG → Controlling → Organization → Subsequent Assignment of Company Codes → Define Ledger for CO Version

Document Splitting & Master Data

Document Splitting: GSP_LZ2 – Activate Document Splitting per Company Code

Create Profit Center: KE51 – SAP Easy Access → Controlling → Profit Center Accounting → Master Data

Create Cost Center: KS01 – SAP Easy Access → Controlling → Cost Center Accounting → Master Data

Tax Configuration

Complete tax setup in SAP covering calculation procedures, tax codes, G/L accounts, automatic payments, and withholding tax.

Core Tax Setup

Check Calculation Procedure — Code: OBQ3

IMG → Financial Accounting Global Settings → Tax on Sales/Purchases → Basic Settings → Check Calculation Procedure

Assign Country to Calculation Procedure — Code: OBBG

IMG → Tax on Sales/Purchases → Basic Settings → Assign Country to Calculation Procedure

Define Tax Codes — Code: FTXP

IMG → Tax on Sales/Purchases → Calculation → Define Tax Codes for Sales and Purchases

Specify Base Amount — Code: OB69

G/L & Non-Taxable Transactions

Create G/L Master for Taxes — Code: FS00

Accounting → Financial Accounting → General Ledger → Master Records → G/L Accounts → Individual Processing → Centrally

Assign G/L Tax Account — Code: OB40

IMG → Tax on Sales/Purchases → Posting → Define Tax Accounts

Assign Tax Codes for Non-Taxable Transactions — Code: OBCL

IMG → Tax on Sales/Purchases → Posting → Assign Tax Codes for Non-Taxable Transactions

Tax Configuration – Payments & Withholding Tax

Automatic Payment

Code: FBZP

IMG → Financial Accounting → Accounts Receivable and Accounts Payable → Business Transactions → Outgoing Payments → Automatic Outgoing Payments → Payment Method/Bank Selection for Payment Program

Withholding Tax – Basic Settings

Code: SPRO (General)

IMG → Financial Accounting Global Settings → Withholding Tax → Extended Withholding Tax → Basic Settings

Withholding Tax – Calculation (WHT Type)

Code: OBWW

IMG → Financial Accounting Global Settings → Withholding Tax → Extended Withholding Tax → Calculation → Withholding Tax Type

Withholding Tax – Posting

Code: OBWW

IMG → Financial Accounting Global Settings → Withholding Tax → Extended Withholding Tax → Posting → Define Accounts for Withholding Tax to be Paid Over

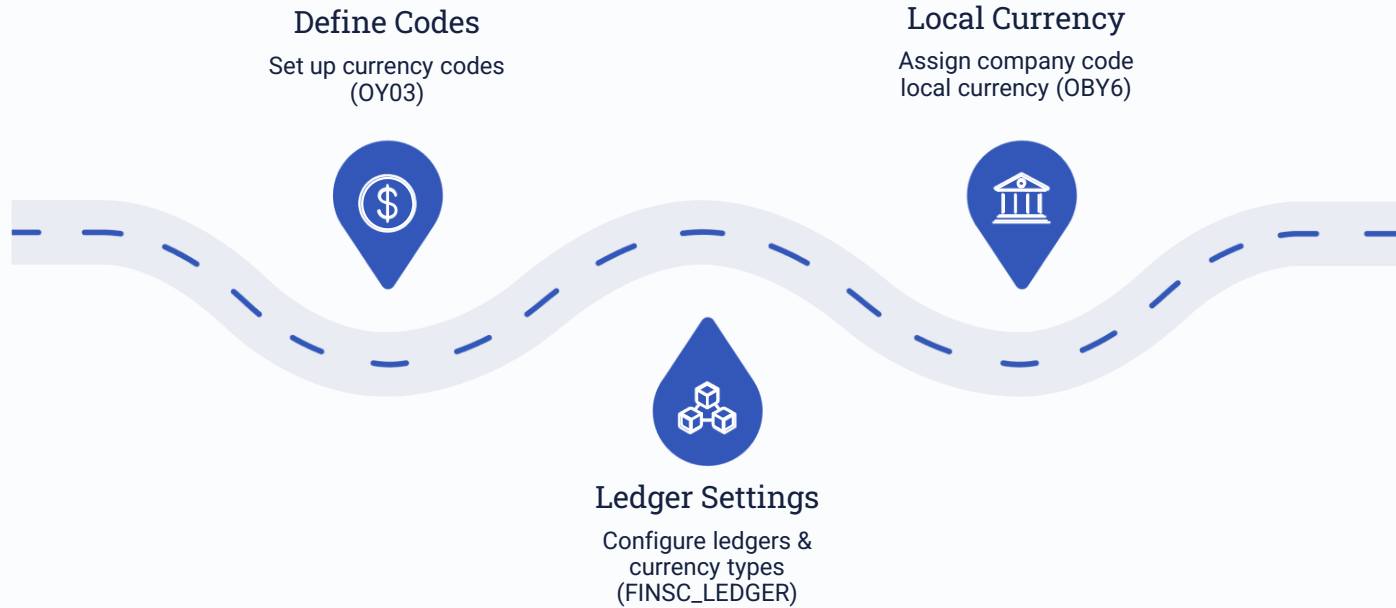

- ❗ Plant Configuration: **Define Plant** (OX10) via SPRO → Enterprise Structure → Definition → Logistics → General → Define Plant.
Assign Plant to Company Code (OX18) via SPRO → Enterprise Structure → Assignment → Logistics → General → Assign Plant to Company Code.

Internal Orders Configuration & Reporting

Internal Orders in SAP monitor costs for specific tasks, projects, or events. These steps cover creation, settlement, and reporting.

- 1 Create Internal Order – K001**
SAP Easy Access → Accounting → Controlling → Internal Orders → Master Data → Special Functions → Order → Create
- 2 Change Internal Order (Set Settlement Rule) – K002**
SAP Easy Access → Accounting → Controlling → Internal Orders → Master Data → Special Functions → Order → Change
- 3 Actual Settlement of Internal Order – K088**
SAP Easy Access → Accounting → Controlling → Internal Orders → Period-End Closing → Single Functions → Settlement → Individual Processing
- 4 Actual/Plan/Variance Report – S_ALR_87012993**
SAP Easy Access → Accounting → Controlling → Internal Orders → Information System → Reports for Internal Orders
- 5 Internal Order Commitment Report – KOB2**
SAP Easy Access → Accounting → Controlling → Internal Orders → Information System

Currency Types Configuration

Currency configuration ensures accurate multi-currency financial reporting across all company codes and ledgers in SAP.

Prepared By 

Cost Allocations & Cost Center Reporting

Cost allocations in SAP CO redistribute costs from sender cost centers using **Distribution** (primary costs) and **Assessment** (secondary cost elements) cycles.

Cost Allocation Steps

Create Primary Cost Element – FS00 / KA01

Accounting → Financial Accounting → General Ledger →
Master Records → G/L Accounts → Centrally

Define Distribution Cycle – KSV1

SPRO → Controlling → Cost Center Accounting → Actual
Postings → Period-End Closing → Distribution

Execute Distribution Cycle – KSV5

Define Assessment Cycle – KSU1

SPRO → Controlling → Cost Center Accounting → Actual
Postings → Period-End Closing → Assessment

Execute Assessment Cycle – KSU5

Cost Center Reporting

Cost Center Reporting provides visibility into actual vs. planned costs, variances, and line item details – essential for period-end review and management decision-making.

Actual/Plan/Variance Report – S_ALR_87013611

SAP Easy Access → Controlling → Cost Center Accounting →
Information System → Reports → Plan/Actual Comparisons →
Cost Centers: Actual/Plan/Variance

Cost Center Line Items – KSB1

SAP Easy Access → Controlling → Cost Center Accounting →
Information System → Reports → Line Items → Cost Centers:
Actual Line Items

 CT3 CT3 Sales
