Define Company-New Entries

- **Company:** **GTEC**
- **Company name:** **Global Tech Industries Ltd**

The first step in the project is to access the implementation area where all system configurations are managed.

- **Command Entry:** Type the transaction code **SPRO** into the SAP command field.
- **Action:** Press **Enter** to navigate to the Customizing: Execute Project screen.

To reach the full configuration tree for **Global Tech Industries Ltd**, we must access the Reference IMG.

- **Action:** Click the **SAP Reference IMG** button.

- **Purpose:** This button opens the hierarchical structure containing all the functional settings for Financial Accounting (FI) and Controlling (CO).

This step launches the specific activity to create the legal entity in the system.

Action: Click the **Execution Icon** (the clock with a checkmark) next to **Define Company**.

- **Action:** Clicked the **New Entries** button .

< **SAP** New Entries: Details of Added Entries

Company: GTEC
 Company name: Global Tech Industries LTD
 Name of company 2: Global Tech Industries LTD

Detailed information

Street: 1
 PO Box: 123
 Postal code: 11511

Define Retained Earnings Account

T-Code :OB53

Financial Accounting -General ledger Accounting-master data-G/L accounts-preparations-
Define Retained Earnings Account-enter chart of account

-I defiended my Equity Group range 300000-399999 (credit)

So I choose **300000**

Its role:

1. Automatic Year-End Closing

This account is the destination for all **P&L (Profit & Loss)** accounts. When you perform the year-end carry-forward, SAP automatically transfers the net balance (profit or loss) into this account.

2. Balance Carry Forward

While Balance Sheet accounts carry their balances forward to themselves, P&L accounts are "zeroed out." The Retained Earnings account ensures that the **Equity** section of the Balance Sheet reflects the accumulated results from the previous year.

Data was saved View details Save

- **Account Type Selection (A):** The symbol "+" was used. This **opens the posting period for all account types** (including Assets, Customers, Vendors, Materials, and G/L accounts) simultaneously.
- **Normal Periods (Period 1):**
 - **From Period: 1 — Year: 2026**
 - **To Period: 12 — Year: 2026**
 - *Result:* This opens the entire fiscal year 2026 for regular daily transactions.
- **Special Periods (Period 2):**
 - **From Period: 13 — Year: 2026**
 - **To Period: 16 — Year: 2026**
 - *Result:* These periods are opened specifically for **year-end adjustments**, audit corrections, and closing entries.

Final Action Update: The **Save** button was executed to commit these expanded date parameters. The system confirms the update with the message: **"Data was saved."**

Define Document Types :

✓ Data was saved [View details](#) [Save](#)

Document Type: Entered as **K2** (Vendor Credit Memo).

Number Range: Set to **02**.

Reverse Document Type: Defined as **KG**.

Account Types Allowed: Enabled for **Assets**, **Supplier**, **Material**, and **G/L Account**.
Required during document entry: **Reference Number** field was selected as mandatory.

Status Bar: System message confirms "Data was saved".

Action: **Save** button was clicked to commit the document type configuration.

The screenshot displays the SAP S/4HANA 'Change View "Document Types": Details' screen for Document Type K3 (Vendor Payment). The interface includes a top navigation bar with the SAP logo and a title bar. Below the title bar, there is a search bar and a 'New Entries' button. The main content area is divided into several sections:

- Properties:** Contains fields for 'Number Range' (set to 05), 'Reverse DocumentType' (set to KZ), and 'Authorization Group'. A 'Number range information' button is also present.
- Account types allowed:** A list of checkboxes for 'Assets', 'Customer', 'Supplier', 'Material', 'G/L Account', and 'Secondary Costs'. 'Assets', 'Supplier', and 'G/L Account' are checked.
- Control data:** A list of checkboxes for 'Net document type', 'Cust/vend Check', 'Negative Postings Permitted', 'Inter-Company', and 'Enter trading partner'. All are unchecked.
- Special usage:** A checkbox for 'BI Only' is unchecked.
- Default values:** A field for 'Exchange Rate Type for FC Documents' is empty.
- Required during document entry:** A checkbox for 'Reference Number' is checked.
- Joint venture:** A checkbox for 'Debit Rec. Inflow' is unchecked.

At the bottom, a status bar shows a green checkmark and the message 'Data was saved View details'. A 'Save' button is located in the bottom right corner.

Document Type: Entered as **K3** (Vendor Payment).

Number Range: Set to **05**.

Reverse Document Type: Defined as **KZ**.

Account Types Allowed: Enabled for **Assets**, **Supplier**, and **G/L Account**.

Required during document entry: **Reference Number** field was selected as mandatory.

Status Bar: System message confirms "Data was saved".

Action: **Save** button was clicked to finalize and store the document type configuration.

✓ Data was saved [View details](#)

I set the following rules for Company Code **TEC1**:

- **Maximum Document Value:** I restricted the maximum amount a user can post in a single entry (e.g., **1,000,000 EGP**).
- **Item Limit:** I limited the value of a single line item in any transaction.

- **Discount Limit:** I set the maximum cash discount (e.g., **20%**) a user can give to a customer.
- **Handling Differences:** I defined small "acceptable errors" (e.g., **100 EGP**). If a payment is slightly off by this amount, the system will automatically clear it instead of blocking the transaction.

Why is it important?

- **Control:** It prevents users from making huge financial entries by mistake.
- **Security:** It ensures that high-value transactions require special authorization.
- **Efficiency:** It allows the system to settle small payment differences automatically, saving time for the accounting team.

Data already saved [View details](#) **Save**

Description: In this final configuration screen, I specified the exact limits for payment differences and successfully saved the settings for the company.

Key Actions:

- **Company Code:** Applied the settings to **TEC1**.
- **Permitted Payment Differences:**
 - **Revenue (Rev.):** Set a limit of **10.00 EGP** or **1.0%**. This means if a customer overpays by this small amount, the system handles it automatically.
 - **Loss:** Set a limit of **1.00 EGP** or **1.0%**. This defines the maximum "underpayment" the company will automatically accept to clear an invoice.
- **Finalizing:** I clicked the **Save** button, and the system confirmed with the message **"Data was saved."**

Purpose: This step ensures that the accounting system can automatically "close" invoices even if there are tiny differences in the payment amount. It keeps the accounts clean and saves the accounting team from manually fixing small rounding errors.
