HOUSE BANKS

COMPANY NAME : GLOBAL TECH 1

COMPANY CODE : TEC1

T CODE : FI12

SPRO-Financial Accounting-Bank Accounting-Bank Accounts-Define House Banks

Meaning: the transaction **FI12** is used to define and manage **House Banks** and their associated **Bank Accounts** for a specific Company Code.

Description: New Entries: Details of House Bank

The screenshot displays the SAP SPRO transaction FI12, titled "New Entries: Details of Added Entries". The interface includes a menu bar at the top with options like "Table View", "Edit", "Goto", "Selection", "Utilities", "System", and "Help". Below the menu, the SAP logo is visible, followed by the title bar. The main area is divided into a left-hand "Dialog Structure" pane and a right-hand data entry area. The "Dialog Structure" pane shows a tree view with "Company Codes" expanded, and "House Banks" selected. The data entry area contains the following fields and buttons:

- Company Code:** TEC1 (Global Tech Egypt 1)
- House Bank:** ABLI
- House Bank Data:**
 - Bank Ctry/Reg.:** EG (with a "Create" button)
 - Bank Key:** GT_NBE (with a "Change" button)
- Communications data:**
 - Telephone 1:** (empty field)
 - Tax Number 1:** (empty field)
 - Contact Person:** (empty field)
- Buttons:** "Address", "EDI partner profiles", and "Data medium exchange" (all with icons).

At the bottom right, there are "Save" and "Cancel" buttons. The Windows taskbar is visible at the very bottom of the screen.

T-Code: (GUI)or FI12_HBANK

App Name (Fiori): Manage Bank Accounts

Step Description: Maintaining Bank Account Master Data

The screenshot displays the SAP Fiori 'Manage Bank Accounts' interface for Bank Account 0000000082. The interface is in Arabic and shows the 'General Data' tab. The account is currently 'Active' and was opened on '04/28/2026'. The entity details include Company Code 'TEC1' (Global Tech Egypt 1) and Company Country/Region 'EG' (Egypt). The account holder is 'Global Tech Egypt 1'. The account details show Bank Country/Region 'EG' (Egypt) and Bank Key 'GT_NBE' (البنك الأهلي المصري). The payment data section includes Cut-Off Time Domestic and Cut-Off Time Cross Border, both set to '00:00:00'. The account number is '0000000082'.

The SAP Fiori interface to manage the master data for a specific bank account under **Company Code TEC1**. This is a modern approach in SAP S/4HANA that replaces the older, more limited screens.

Status & Opening Date: Confirms the account is **Active** and shows its start date (04/28/2026).

Account Holder: Specifically identifies "Global Tech Egypt 1" as the legal owner.

Bank Key (GT_NBE): Links this account to the National Bank of Egypt branch configured previously.

Alternative T-Code (GUI):

App Name (Fiori): Manage Bank Accounts

Step Description: Defining House Bank Account Connectivity

critical integration step in **SAP S/4HANA** within the **House Bank Account Connectivity** tab. This step links the technical bank account master data to the specific House Bank used for accounting.

ID Category: Set to "Central System: House Bank Account," which means this account is controlled centrally.

House Bank (AHLI) & Account (AHLI): You are explicitly linking the Bank Account (0000000082) to the House Bank "AHLI" that was configured in earlier steps.

Validity: The connection is valid starting from **04/28/2026**.

T-Code: FI12

Description: Manage House Banks and House Bank Accounts

Financial Accounting > Banks > Master Data > House Banks and House Bank Accounts.

"**Manage House Banks and House Bank Accounts**". This is the modern, integrated entry point in SAP S/4HANA for configuring your banking

Defining the **House Bank** (the physical bank branch).

Linking it to specific **Bank Accounts** and their corresponding G/L accounts.

T-Code: FS00

Description: Display G/L Account Centrally

the Master Data for a General Ledger (G/L) account within the Chart of Accounts (TEC) for Company Code TEC1 (Global Tech Egypt 1). This specific account is essential for your banking integration. G/L Account: The account number is **160000**

T-Code: FBZP

Description: Maintain Payment Program Configuration

The screenshot shows the SAP S/4HANA 'New Entries: Details of Added Entries' screen for Company Code TEC1 (Global Tech Egypt 1). The interface includes a top menu bar with options like Table View, Edit, Goto, Selection, Utilities, System, and Help. Below the menu, there's a header bar with the SAP logo and the title 'New Entries: Details of Added Entries'. The main content area is divided into several sections: 'Control Data' with fields for 'Sending company code' (TEC1) and 'Paying company code' (TEC1), both linked to 'Global Tech Egypt 1'. There are checkboxes for 'Separate Payment per Business Area' and 'Pyt Meth Suppl.'. The 'Cash discount and tolerances' section includes fields for 'Tolerance Days for Payable', 'Outgoing Pmnt with Cash Disc.From', and 'Max.Cash Discount'. The 'Vendors' section has fields for 'Sp. G/L Transactions to Be Paid' and 'Sp. G/L Trans. for Exception List'. At the bottom, a status bar indicates 'Data was saved' with a 'View details' link, and buttons for 'Save' and 'Cancel'. The Windows taskbar is visible at the very bottom.

he **Automatic Payment Program (APP)**, which is one of the most powerful tools in SAP FI for managing outgoing payments to vendors. You are specifically defining how **Company Code TEC1 (Global Tech Egypt 1)** behaves within the payment run.

T-Code: FBZP

Description: Maintain Payment Program Configuration

The screenshot displays the SAP FBZP transaction interface for maintaining payment program configuration. The title bar indicates 'New Entries: Details of Added Entries'. The main header shows the company code 'TEC1' and the company name 'Global Tech Egypt 1'. A 'Company Codes' button is available. The 'Control Data' section contains the following fields and checkboxes:

- Minimum Amount for Incoming Payment: 1.00 EGP
- Minimum Amount for Outgoing Payment: 1.00 EGP
- No Exchange Rate Differences: ☐
- No Exch.Rate Diffs. (Part Payments): ☐
- Separate Payment for Each Ref.: ☐
- Bill/Exch Pymt: ☐
- Direct Debit Pre-Notifications: ☐

The 'Specifications for SEPA Payments' section includes a 'Creditor Identification Number' field. At the bottom, there are buttons for 'Forms' and 'Sender Details'. A status bar at the bottom indicates 'Data was saved' with a 'View details' link and 'Save' and 'Cancel' buttons.

he **Paying Company Code** settings for **TEC1 (Global Tech Egypt 1)**. While the previous step defined the relationship between companies

Incoming/Outgoing Payment (1.00 EGP): You have set the minimum threshold to **1.00 EGP**. This prevents the system from generating costly payment transactions for very small, insignificant amounts

? **T-Code:** FBZP

? **Description:** Maintain Payment Program Configuration

he final and most detailed stage of the **Automatic Payment Program (APP)** configuration. You are specifically working on **Bank Selection** for the Paying Company Code **TEC1 (Global Tech Egypt 1)**.

T-Code: FBZP

Description: Maintain Payment Program Configuration

Specific Sub-step: Ranking Order

the **Ranking Order** for the Paying Company Code **TEC1 (Global Tech Egypt 1)**. This is a vital part of the **Bank Selection** process in the Automatic Payment Program (APP).

? **T-Code:** FBZP

? **Description:** Maintain Payment Program Configuration

Specific Sub-step: Bank Accounts

the most critical steps in the **Automatic Payment Program (APP)** configuration. You are linking your physical house banks to the specific General Ledger (G/L) accounts for the Paying Company Code **TEC1 (Global Tech Egypt 1)**.

T-Code: FBZP

Description: Maintain Payment Program Configuration

Specific Sub-step: Bank Accounts Overview

House bank	P.	Curre.	Account ID	Bank Subaccount	Charge ind	Bus.
☐ AHLI	C	EGP	AHLI	160001		
☐ ALEX	C	EGP	ALEX1	190001		
☐ CIB	C	EGP	CIB2	180001		
☐ MISR	C	EGP	MISR1	170001		

TEC1 (Global Tech Egypt 1). This configuration links house banks and specific account IDs to their respective General Ledger (G/L) bank subaccounts for the **Automatic Payment Program**.

Bank Account Configuration Summary

All accounts are configured for payment method **C** and transaction currency **EGP**:

House Bank	Account ID	Bank Subaccount (G/L)	Description (from previous records)
AHLI	AHLI	160001	National Bank of Egypt - Outgoing
ALEX	ALEX1	190001	Alex Bank Egypt - Outgoing
CIB	CIB2	180001	CIB Bank - Main/Outgoing
MISR	MISR1	170001	Banque Misr - Outgoing

CASH MANUEL BANKS

COMPANY NAME : GLOBAL TECH 1

COMPANY CODE : TEC1

T-Code FF67: SPRO (SIMG)

IMG → Financial Accounting → Bank Accounting → Business Transactions → Payment Transactions → Manual Bank → Create and Assign Business Transactions

The image shows the **SAP Easy Access** main screen, where a user is attempting to enter a transaction code into the command field.

The user has selected the **Financial Accounting** node within the structure.

Financial Accounting (FI): You have highlighted the "Financial Accounting" node. This is the module responsible for recording the financial impact of business transactions and external reporting (Balance Sheets, P&L statements).

The image displays the configuration hierarchy for **Bank Accounting** within the SAP

Bank Accounting: This section is used to manage all bank-related transactions, including bank master data creation, bank statement processing, and payment transactions.

Payment Transactions Node: This area is critical for defining how the system handles outgoing and incoming payments. In SAP S/4HANA, the **Payment Transactions** section within the Implementation Guide (IMG) is the core configuration area for managing all incoming and outgoing cash flows for a company like **TEC1**.

Manual Bank Statement: This section is used to set up the parameters for entering bank statement data manually into the SAP system when electronic integration is not

available. **Create and Assign Business Transactions: Defining the types of transactions (like bank charges or transfers) found on a statement. for a company like TEC1.**

Step Description: Determining Work Area (Chart of Accounts) for Bank Statement Configuration. Defining the Scope: SAP configuration is often organized by "Work Areas" to ensure you are only editing data relevant to a specific organizational unit.

Chart of Accounts (COA): You are required to enter a specific Chart of Accounts (in the image, GL00 is being entered). The Chart of Accounts is a structural list of all general ledger accounts used by one or more company codes.

Create Account Symbols

This screen is a critical step in configuring the manual bank statement for the **TEC1** chart of accounts. It allows you to create abstract placeholders known as **Account Symbols** to simplify the posting process.

Key Components

- **Account Symbol:** A unique identifier used to represent a specific group of accounts (e.g., Main Bank, Bank Clearing, or Bank Charges).
- **Description:** A text field to define the purpose of the symbol (e.g., "Main Account for Bank ALEX").
- **Dialog Structure:** On the left, you can see the logical sequence of the configuration:
 1. **Create Account Symbols:** Defining the placeholders (the current screen).
 2. **Assign Accounts to Account Symbols:** Mapping these symbols to actual General Ledger accounts.
 3. **Create Keys for Posting Rules:** Defining the transaction types.
 4. **Define Posting Rules:** Setting the debit/credit logic for the entries.

? **Active Configuration:** The user is defining placeholders known as **Account Symbols** to be used in posting rules.

? **Defined Symbols:**

- **TE00:** Main Bank Account.
- **TE01:** Outgoing Payment.
- **TE02:** Incoming payment.
- **TE03:** Bank Charges.

Overview: Assigning G/L Accounts

The purpose of this screen is to map the abstract account symbols created previously to actual **General Ledger (G/L) Accounts**.

- **Chart of Accounts:** The configuration is being applied to the chart of accounts identified as **TEC**.
- **Active Mapping:**
 - **TE00 (Main Bank Account)** is mapped to a G/L account pattern ending in **0**.
 - **TE01 (Outgoing Payment)** is mapped to a G/L account pattern ending in **1**.
 - **TE02 (Incoming payment)** is mapped to a G/L account pattern ending in **2**.
 - **TE03 (Bank Charges)** is mapped to a G/L account 522115.

Create Keys for Posting Rules

The purpose of this screen is to define unique identifiers (Keys) for the various types of financial transactions that appear on a bank statement. These keys act as the link between the transaction description and the actual accounting logic that will be defined in the next step.

- **Active Selection:** The left-hand sidebar shows that you are on the third step of the configuration hierarchy: **Create Keys for Posting Rules**.
- **New Entries:** You have successfully defined three custom keys:
 - **TE01:** Outgoing Payment.
 - **TE02:** Incoming Payment.
 - **TE03:** Bank charges.
- **Status Confirmation:** The green checkmark at the bottom left confirms "**Data already saved,**" indicating these keys are now stored in the system.

The screenshot shows the SAP 'New Entries: Details of Added Entries' dialog. The 'Define Posting Rules' option is selected in the left-hand 'Dialog Structure' tree. The main area is divided into 'Debit' and 'Credit' sections, each with fields for 'Posting Key', 'Sp.G/L Indicator', 'Account Symbol', and a 'Compression' checkbox. Below these sections are fields for 'Document Type', 'Posting Type', 'Posting on Acct Key', and 'Reversal Reason'. The bottom right corner has 'Save' and 'Cancel' buttons. The SAP menu bar and Windows taskbar are visible at the top and bottom of the window.

T-Code: SPRO

Step Description: Defining Posting Rules for Bank Statement.

Define Posting Rules

This screen is used to establish the exact accounting logic for each transaction type. It tells the system how to automatically generate journal entries when a specific bank activity is recorded.

The screenshot shows the SAP 'New Entries: Details of Added Entries' dialog. The 'Posting Rule' is set to 'TE01' and the 'Posting Area' is '1'. The 'Dialog Structure' on the left lists 'Create Account Symbols', 'Assign Accounts to Account Symbol', 'Create Keys for Posting Rules', and 'Define Posting Rules'. The 'Debit' side has 'Posting Key' (empty), 'Sp.G/L Indicator' (empty), 'Account Symbol' 'TE01', and 'Compression' (unchecked). The 'Credit' side has 'Posting Key' '50', 'Sp.G/L Indicator' (empty), 'Account Symbol' 'TE00', and 'Compression' (unchecked). At the bottom, 'Document Type' is 'SA', 'Posting Type' is '4', 'Posting on Acct Key' (empty), and 'Reversal Reason' (empty). 'Save' and 'Cancel' buttons are at the bottom right.

Posting Rule Configuration Details

This configuration defines the accounting logic for the rule **TE01**:

- **Posting Rule & Area:** The rule **TE01** is assigned to **Posting Area 1**, which typically indicates a direct posting to the Bank Account.
- **Debit Side Logic:**
 - The **Account Symbol** used for the debit entry is **TE01** (Outgoing Payment).
- **Credit Side Logic:**
 - The **Posting Key** is set to **50**, which is the standard SAP code for a G/L account credit.
 - The **Account Symbol** for the credit entry is **TE00** (Main Bank Account).

The screenshot displays the SAP configuration interface for a new posting rule. The title bar indicates 'New Entries: Details of Added Entries'. On the left, a 'Dialog Structure' pane lists steps: 'Create Account Symbols', 'Assign Accounts to Account Symbol', 'Create Keys for Posting Rules', and 'Define Posting Rules' (which is the active step). The main area contains the following fields:

- Posting Rule:** TE02
- Posting Area:** 1
- Debit Side:**
 - Posting Key:** 50
 - Sp.G/L Indicator:** (empty)
 - Account Symbol:** TE00
 - Compression:** (checkbox, unchecked)
- Credit Side:**
 - Posting Key:** (empty)
 - Sp.G/L Indicator:** (empty)
 - Account Symbol:** TE002
 - Compression:** (checkbox, unchecked)
- Technical Specifications:**
 - Document Type:** SA
 - Posting Type:** 5
 - Posting on Acct Key:** (empty)
 - Reversal Reason:** (empty)

At the bottom, a status bar shows 'Data was saved' and buttons for 'Save' and 'Cancel'.

Posting Rule TE02 Configuration

This configuration defines the automated accounting logic for transactions categorized under this rule:

- **Rule & Area:** The configuration is for **Posting Rule TE02** assigned to **Posting Area 1**.
- **Debit Side:**
 - **Posting Key:** Set to **50** (the standard SAP code for a G/L account debit).
 - **Account Symbol:** Linked to **TE00** (previously defined as the Main Bank Account).
- **Credit Side:**
 - **Account Symbol:** Linked to **TE02** (previously defined as Incoming Payment).
- **Technical Specifications:**
 - **Document Type:** **SA** (G/L Account Document).
 - **Posting Type:** **5**.

The screenshot displays the SAP configuration window for Posting Rule TE03. The window is titled 'New Entries: Details of Added Entries'. On the left, a 'Dialog Structure' pane lists the following steps: 'Create Account Symbols', 'Assign Accounts to Account Symbol', 'Create Keys for Posting Rules', and 'Define Posting Rules'. The main area is divided into 'Debit' and 'Credit' sections. At the top, 'Posting Rule' is set to 'TE03' and 'Posting Area' is set to '1'. The 'Debit' section has 'Posting Key' set to '40', 'Sp.G/L Indicator' as an empty field, 'Account Symbol' set to 'TE03', and a 'Compression' checkbox. The 'Credit' section has 'Posting Key' set to '50', 'Sp.G/L Indicator' as an empty field, 'Account Symbol' set to 'TE00', and a 'Compression' checkbox. Below these sections, 'Document Type' is set to 'SA', 'Posting Type' is set to '4', 'Posting on Acct Key' is an empty field, and 'Reversal Reason' is an empty field. At the bottom right, there are 'Save' and 'Cancel' buttons. The SAP menu bar at the top includes 'Table View', 'Edit', 'Goto', 'Selection', 'Utilities', 'System', and 'Help'.

Posting Rule TE03 Configuration Details

This configuration defines the specific accounting entries for bank-related transactions categorized under rule **TE03**:

- **Rule and Posting Area:** The configuration is applied to **Posting Rule TE03** within **Posting Area 1**.
- **Debit Side Configuration:**
 - **Posting Key:** Set to **40**, which is the standard SAP code for a G/L account debit.
 - **Account Symbol:** Linked to **TE03**, which represents the account for bank charges.
- **Credit Side Configuration:**
 - **Posting Key:** Set to **50**, which is the standard SAP code for a G/L account credit.
 - **Account Symbol:** Linked to **TE00**, representing the Main Bank Account.

Brief Summary of Your SAP Configuration Progress

Based on the recent screenshots, here is a concise summary of your current status:

- Error Resolution:** You resolved the "Chart of Accounts TEC1 is not defined" error by identifying that the company code **TEC1** is actually mapped to the Chart of Accounts **TEC**.

Create and Assign Business Transactions screen in SAP S/4HANA, which is a key part of the bank accounting configuration.

Overview: Assigning Business Transactions

This configuration screen allows you to link external transaction codes—the codes provided by your bank on a statement—to internal SAP **Posting Rules**.

Trans. type: 1

Tran	+	Post. Rule	Acct mod	Int.Algor.	Text
TE01	+	TE01			
TE02	+	TE02			
TE03	-	TE03			

Position...

Entry 1 of 3

Data was saved [View details](#) [Save](#) [Cancel](#)

Create and Assign Business Transactions screen in SAP S/4HANA, which completes the mapping between bank activity and internal accounting logic.

Overview: Business Transaction Assignment

- **Transaction Type:** The user has assigned this group of settings to transaction type **1**.
- **External Transactions (Tran):** Three bank-specific codes have been entered: **TE01**, **TE02**, and **TE03**.
- **Sign Selection (+/-):** For transaction **TE03**, a minus sign (-) is specified, indicating this code represents a cash outflow or debit from the bank's perspective.

This configuration step links the external transaction codes from your bank statement to the internal posting rules you have previously defined.

- **Transaction Type:** The user has assigned this group of settings to transaction type **1**.
- **External Transactions (Tran):** Three bank-specific codes have been entered: **TE01**, **TE02**, and **TE03**.

Sign Selection (+/-): For transaction **TE03**, a minus sign (-) is specified, indicating this code represents a cash outflow or debit from the bank's perspective.
