

Configuration Assets to companies (TEC2 -TEC5)

Asset Accounting settings were copied from Company Code TEC1 to four other companies. While most configurations remain identical, specific adjustments were made to the following settings:

1- Tax Integration

8- Asset Class

1. What is an Asset Class?

An **Asset Class** is a method used to categorize fixed assets based on their nature (e.g., Buildings, Machinery, Office Equipment). Through this classification, the system determines the default characteristics for every individual asset created thereafter.

2. Key Components in the OAOA Screen

When accessing the **OAOA** configuration, you will define several critical parameters for each class:

- **Account Determination:** This is the most vital link; it specifies the **General Ledger (G/L) Accounts** that will be impacted during asset acquisition, depreciation, or retirement.
- **Screen Layout:** This determines the fields that appear during asset creation (e.g., is the "Serial Number" field mandatory, optional, or suppressed?).
- **Number Range:** This defines the numerical sequence assigned to each asset class.
- **Asset under Construction (AuC):** This identifies whether the class is designated for assets still in progress (which typically are not depreciated until completion).

3. Objectives and Advantages of the OAOA Process

- **Organization:** Categorizing assets into logical groups simplifies the financial reporting process.
- **Automation:** Once an "Asset Class" is selected when defining a new asset, the system automatically populates the relevant financial and tax data.
- **Control:** Ensures that each category of assets adheres to specific depreciation rules and designated accounts within the balance sheet

9-Define Screen layout for Asset Master

It is the tool that ensures every asset defined in the system contains all the data required for reporting and control, with minimal effort from the data entry user.

Controls (Name, Vendor, Location, Cost Center)

The image shows two screenshots from the SAP S/4HANA configuration interface.

The top screenshot displays the 'Structure' tree. The path is: **Asset Accounting** > **Master Data** > **Screen Layout** > **Define Screen Layout for Asset Master Data**. A red arrow points to the 'Define Screen Layout for Asset Master Data' item.

The bottom screenshot shows the 'Select Activity:' screen. The 'Activities' list contains the following items:

Perf...	Name of Activity
✓	Define Screen Layout for Asset Master Data
	Create Screen Layout Rules for Asset Master Record
	Configurable Entry Screen for Creating Multiple Assets

The 'Define Screen Layout for Asset Master Data' activity is selected, indicated by a green checkmark in the 'Perf...' column.

Asset G/L Master

To complete the accounting cycle for an asset, you need to define the following accounts in FS00:

- **Asset Cost Account:** Appears in the Balance Sheet (Assets side).
- **Accumulated Depreciation Account:** Appears in the Balance Sheet (as a contra-asset/deduction from assets).
- **Depreciation Expense Account:** Appears in the Income Statement.
- **Gain/Loss on Asset Disposal Accounts:** To handle cases of asset retirement or sale

Balance Carry forward

Accounting -Financial Accounting-Fixed Assets -Periodic Processing - Year-End Closing -> FAA_CMP - Execute/Undo

T – Code FAA_CMP

The screenshot shows the SAP Easy Access interface. The left-hand navigation menu is expanded, showing the path: Posting > Asset > Periodic Processing > Year-End Closing. Under 'Year-End Closing', the transaction 'FAA_CMP - Execute/Undo' is highlighted. Other transactions visible include 'SCMA - Schedule Manager', 'Depreciation Run', 'AR11N - Investment Grant', 'S_ALR_87099918 - Primary Cost Planning: Depreciation/It', 'Revaluation for the Balance Sheet', 'Fiscal Year Change', and 'FAA_CLOSE_FISC_YEARS - Execute (Cross-Company)'. The main area on the right displays the 'Global Bike' logo. At the bottom right, there is an 'Activate Windows' watermark and an 'Execute' button.

This screenshot is similar to the one above, but it includes a red error message at the bottom of the SAP interface. The message reads: 'You are not authorized to use transaction FAA_CMP'. The navigation menu and the 'Global Bike' logo are still visible. The 'Execute' button at the bottom right is also present.

You are not authorized to use transaction FAA_CMP
