Configuration

Group B

Configuration (TEC2 - TEC5)

- "Based on the approved business model for **Global Tech Group**, a '**Template Company**' strategy was implemented. **TEC1** was established as the baseline reference, containing all core financial and tax configurations.
Using **T-Code: EC01**, we performed a full organizational copy from the template to the subsidiary companies (TEC2 through TEC5). This approach was selected to ensure rapid deployment and standardized accounting policies across all entities in Egypt and the UAE, while maintaining seamless integration with financial tables and document number range
- "The implementation phase began with T-Code: EC01 to generate the organizational copy tool. This was followed by accessing the Global Parameters screen (OBY6) to review and fine-tune each entity's settings, such as updating the local currency for UAE branches to AED and verifying the synchronization of the Chart of Accounts and Fiscal Year variants."

Then complete the remaining connections

Global Parameters Setup for Group Companies (TEC2, TEC3, TEC4, TEC5)

Description:

"To ensure financial consistency across the **Global Tech** group, global organizational and accounting parameters were successfully activated for the four new company codes. The following configuration was applied to each entity:"

- **Accounting Organization:** All companies were assigned to the unified Chart of Accounts (**TEC**) under the group entity (**GTEC**). The Fiscal Year Variant was defined as (**TC**) to synchronize reporting periods across the group.
- **Processing Parameters:** The Field Status Variant (**TEC**) and Posting Period Variant (**TC**) were assigned to each company code to ensure standardized posting controls and financial governance.
- **Control Settings:** Standard processing rules—including Business Area Financial Statements and Proposed Fiscal Year settings—were reviewed and maintained at default to support seamless integration.
- **Status:** A system notification confirms "Data already saved," finalizing the organizational and global data for all newly created company codes.

Controlling Area Integration (CO Integration - T-Code: OKKP)

Description:

"To ensure comprehensive financial control and effective cost/profit management across the group, the four new company codes (TEC2, TEC3, TEC4, TEC5) were successfully assigned to the unified Controlling Area (TEC). This integration enables centralized management reporting and real-time monitoring of Cost Centers and Profit Centers across all entities in Egypt and the UAE, facilitating group-wide financial analysis and performance tracking."

"The administrative structure was designed to balance centralized control with local operational tracking:

- Profit Centers: A unified Profit Center structure was utilized across all entities to enable consolidated profitability analysis for the group's business segments (Sensors & Control Panels).
- Cost Centers: New and dedicated Cost Centers were created for each company code using the unique prefix (ct). This ensures precise allocation and tracking of operational and administrative expenses specific to each branch in Egypt and the UAE independently."

- "The table above illustrates the Cost Center hierarchy created and activated for all group entities (TEC1 to TEC5). A precise coding methodology was implemented to assign each cost center to its respective Company Code and functional area (Production, Administration, Sales). This structure ensures full segregation of operating expenses between the Egyptian and UAE branches, enabling detailed analytical reporting to monitor the performance of each responsible team within every legal entity independently."

"The first digit of the Cost Center code represents the Company Code for easier filtering and reporting."

Retained Earnings Account - T-Code: OB53:

"We verified the assignment of the Retained Earnings Account (A/C 300000) to the unified Chart of Accounts (**TEC**). This configuration ensures that the system automatically carries forward net profits or losses to the correct Balance Sheet account at the end of the fiscal year for all group entities via **T-Code: OB53**."

Financial Tolerance Groups

(T-Code: OBA4 & OBA3)

"To maintain strict internal control over financial postings, Tolerance Groups were configured and verified for all group entities. This setup ensures:"

- **For Employees (OBA4):** Defining the maximum amount per document and the permitted payment differences for accountants across Egypt and UAE branches.
- **For Vendors/Customers (OBA3):** Establishing acceptable thresholds for minor differences during clearing and payment activities.
- **Status:** Verification was completed for each company code (TEC2 to TEC5), ensuring a seamless posting environment for users while maintaining financial governance."

Configuration - Accounts Payable & Receivable (AP & AR):

"Following the replication process via **T-Code: EC01**, a comprehensive technical audit was performed on the Accounts Payable (AP) and Accounts Receivable (AR) configurations for the new entities. The audit confirmed that all essential settings—including Account Groups, Number Ranges, and Reconciliation Accounts—were successfully and completely migrated. This verifies the efficiency of the template-based copy strategy, which ensured that all financial controls and master data structures were accurately replicated from the template to the subsidiaries without requiring manual reconfiguration."

Configuration -Cash Journal:

To manage daily cash transactions effectively, the Cash Journal module was activated for all group entities. The configuration involved the following key steps:"

- **Number Ranges (FBCJC1):** Unique document number intervals were defined for each company code (e.g., TEC2) to ensure segregated and organized cash documentation.
- **Cash Journal Definition:** Dedicated cash journals were established for various branches (e.g., Giza Branch for TEC2 & TEC3, and Dubai Branch for TEC5), linked to their respective G/L accounts.
- **Currency Management:** Journals were configured with appropriate local currencies; Egyptian Pounds (EGP) for Egypt-based entities and UAE Dirhams (AED) for the Dubai entity (TEC5).
- **Outcome:** All settings were successfully saved and validated, rendering the system ready for processing cash receipts, payments, and real-time cash position reporting for each branch."
