2. Entering Documents Using Simple and General Methods

Meaning : It refers to recording accounting entries in SAP through two ways: Simple" methods using user-friendly, single-screen transactions (like FB50 or FB60), and "General" methods using traditional, multi-step transactions (like F-02) that rely on Posting Keys to define the nature of the entry.

- Sample entry

recording accounting entries in SAP through single-screen transactions

T- CODE - FB50

Path : Financial Accounting → document entry → enter G/L Accounts document

Action :

After Posting the document SAP automatically assigns a unique document number from the predefined number range for that specific fiscal year.

- General Entry

: It refers to recording accounting entries in SAP through General methods using traditional, multi-step transactions (like F-02) that rely on Posting Keys to define the nature of the entry.

Path : Financial Accounting → document entry → general posting

TCODE : F-02

ACTION :

It is the traditional and most flexible way to record entries in SAP. It relies heavily on Posting Keys, where the accountant manually specifies the posting type for each line (Debit or Credit) and the account type (G/L, Customer, Vendor, or Assets). This method provides full control over every aspect of the document and is typically used for complex adjustments that simplified screens cannot handle.

The screenshot displays the SAP 'Enter G/L Account Posting: Header Data' screen. The top menu bar includes 'Document', 'Edit', 'Goto', 'Extras', 'Settings', 'System', and 'Help'. The title bar shows the SAP logo and the window title 'Enter G/L Account Posting: Header Data'. Below the title bar, there is a toolbar with buttons for 'Held Document', 'Account Assignment Model', 'Fast Entry', 'Post with Reference', 'Editing Options', and 'More'. The main form area contains several input fields: 'Document Date' (2026.04.24), 'Type' (SA), 'Company Code' (TEC1), 'Posting Date' (2026.04.24), 'Period' (4), 'Document Number' (empty), 'Reference' (empty), 'Cross-CC Number' (empty), 'Doc. Header Text' (إفانورة مياه), and 'Trading Part.BA' (empty). A vertical scrollbar is visible on the right side of the form.

3. Park GL Document

MEANING : It is a feature that allows accountants to save a document "temporarily" in the system without posting it to the account balances. This is used to record available data while allowing for later completion of missing info or for review and approval by a supervisor before the final posting.

TCODE – FV50

PATH : Financial Accounting → document entry → Edit Or Park G/L Document

Action :

At this stage, the document is assigned a number and all entered data is stored in the database, but the system does not update account balances

4. GENERAL DOCUMENT PARKING

Meaning : This is a broader concept that allows parking **any type** of financial document in the system. It includes Vendor accounts (AP), Customer accounts (AR), and Fixed Assets, in addition to the G/L. It is generally used for transactions relying on Posting Keys

TCODE – FBV1

PATH : Financial Accounting → document entry → GENERAL Document PARKING

5. POST PARKED DOCUMENT

MEANING : This is the final step where a document is converted from "Parked" status to "Posted" status. During this process, the system updates the balances of General Ledger accounts, as well as vendor or customer accounts.

TCODE- FBV0

PATH : Financial Accounting → document → PARKED DOCUMENT → POST OR DELETE

ACTION :

Enter the required document number for posting and then press the Post button.

The image shows two screenshots of the SAP 'Post Parked Document' interface. The top screenshot is the 'Initial Screen' where the 'Company Code' is set to 'TEC1', 'Document Number' is '100007', and 'Fiscal Year' is empty. The bottom screenshot is the 'Overview' screen showing document details: Date (2026.04.24), Type (SA), Company Code (TEC1), Posting Date (2026.04.24), Period (4), Document Number (100007), Fiscal Year (2026), Reference (empty), Trading part.BA (empty), Doc.Header Text (تسوية), Texts Exist (unchecked), and Net Entry (unchecked). Below this is a 'Line items' table with two entries: 'General Expenses' (10,000.00) and 'bank cash' (10,000.00-). At the bottom right, a green arrow points to the 'Post document' button.

8. Entering Reference Documents

- Meaning : This is a technique in SAP that allows you to create a new entry based on an existing document already in the system. Instead of manually entering all data, you call up an old document number (the reference), and the system copies all details into the new entry, allowing you to modify them before final saving.

- Sample Document Template

9. Change Sample Document

MEANING : This refers to the process of modifying a "Sample Document" that has been previously created and stored in the system. Since sample documents do not affect financial account balances and function only as templates for recurring entries, changing them ensures the template is updated with the correct data before being used for actual postings.

PATH: Financial Accounting → document → REFERENCE DOCUMENTS
→ SAMPLE DOCUMENT → CHANGE

11. Recurring Document

MEANING : It is a special type of document used to record financial transactions that repeat regularly with the same amounts and accounts (such as office rent, monthly installments, or insurance premiums). Instead of manually entering the transaction every month, you create a "recurring template" and define a schedule (e.g., the 1st of every month). The system then automatically generates the actual entries based on this predefined schedule.

TCODE- FBDI

PATH : Financial Accounting → document ENTRY → REFERENCE DOCUMENTS
→ RECURRING DOCUMENT →

ACTION :

Fill in the data by entering the First Run Date, Last Run Date, Interval in Months, and the Run Day. Select the Document Type, then enter the Debit and Credit G/L accounts along with the amount. Finally, save the document in the system.

14. Excute recurring entry

MEANING : This is the actual process where the user instructs the SAP system to read all previously saved "Recurring Documents" and generate real accounting entries that affect account balances. Posting does not happen automatically on the due date; instead, the accountant must "execute" this function to create a posting file

TCODE – F.14

PATH : Financial Accounting → ACCOUNT → MASTER RECORDS → PERIODIC PROCESSING → RECURRING ENTRIES → EXECUTE

ACTION :

execute the recurring entry, enter the Company Code, Document Number, and the Next Run Date. After clicking Execute, the system will create a Batch Input Session

The screenshot shows the SAP 'Create Posting Documents from Recurring Documents' dialog box. The interface includes a menu bar (Program, Edit, Goto, System, Help) and a toolbar with options like 'Save as Variant...' and 'More'. The main area is divided into sections for data entry:

- Company Code:** A dropdown menu showing 'TECL'.
- Document Number:** A text field containing '2650000'.
- Fiscal Year:** A text field.
- General Selections:** A section containing multiple rows of fields for 'Document Type', 'Posting Date', 'Entry Date', 'Reference Number', 'Reference Transaction', 'Reference Key', and 'Logical System'. Each row has a 'to:' field and a selection button.
- Further Selections:** A section containing a 'Next Run On:' field with the date '2026.04.30' and a 'to:' field.

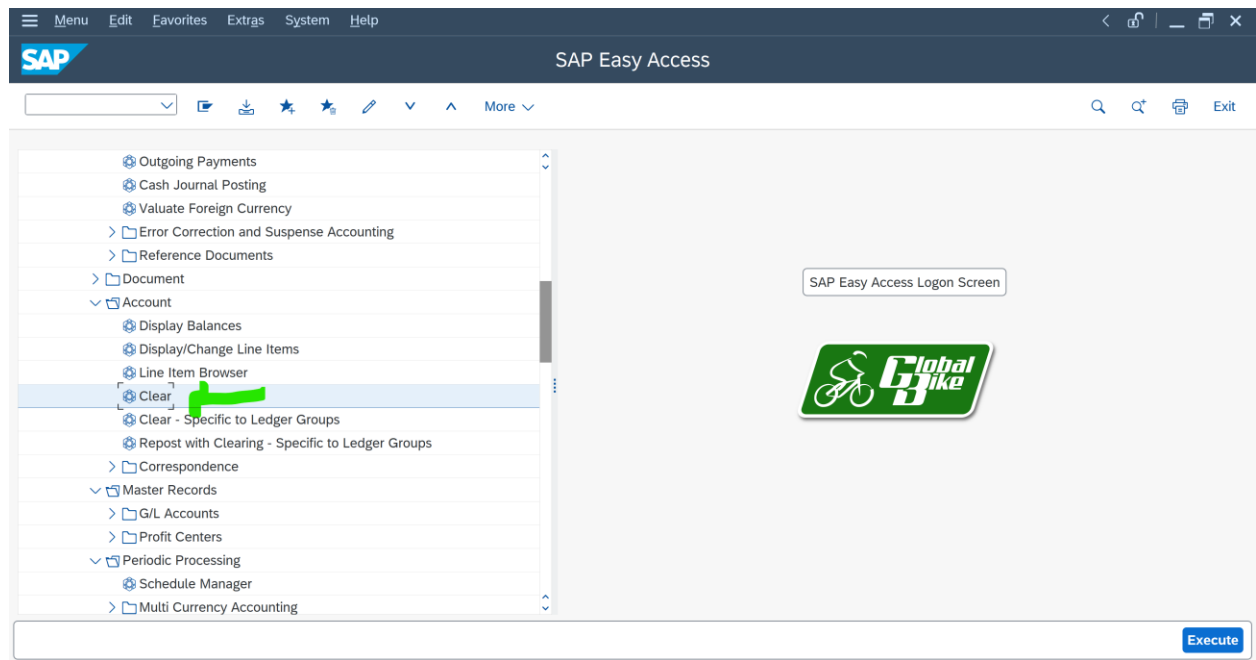

At the bottom, a status bar indicates 'Session SAPF120 was created' with a 'View details' link. An 'Execute' button is located in the bottom right corner. The Windows taskbar at the bottom shows the system time as 6:32 PM.

15. Execute Clearing Operations

MEANING : It is the process of matching "Open Items" to close them (Clearing). For example, matching a vendor invoice with its corresponding payment, or a customer invoice with the bank receipt. Once executed, the status of the items changes from "Open" (Red icon) to "Cleared" (Green icon), indicating that the transaction is financially finalized.

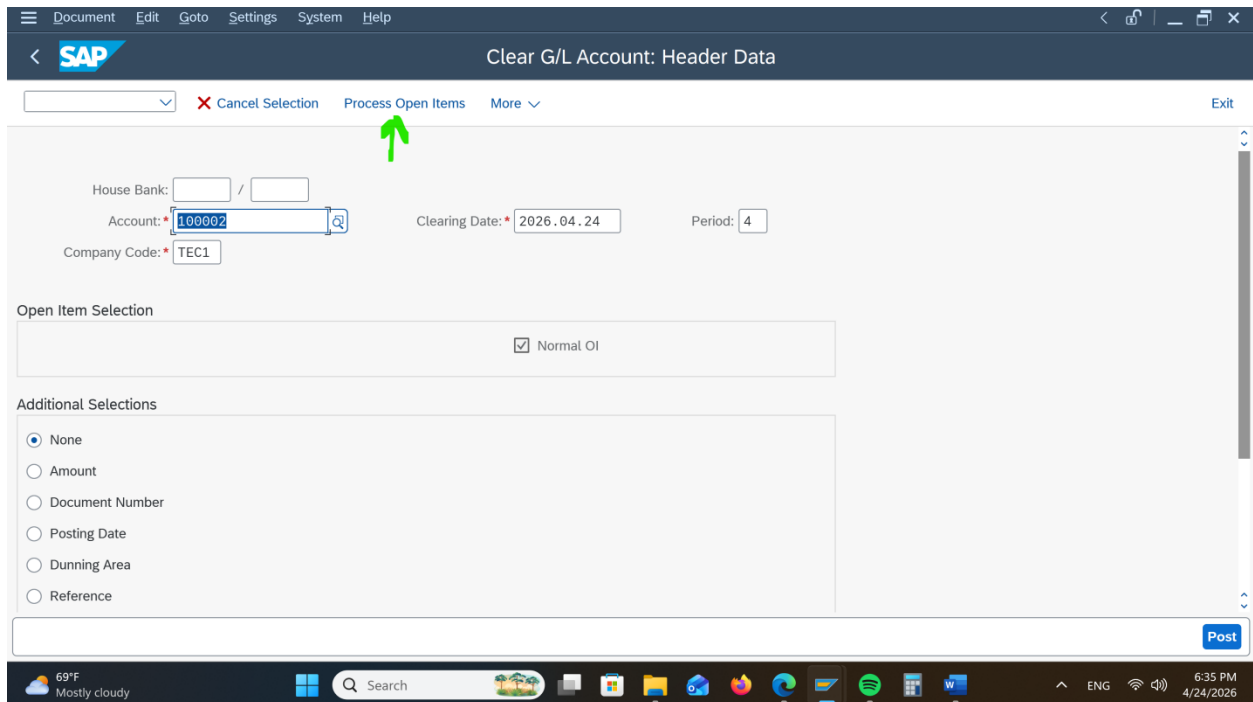

TCODE- F-03

PATH : Financial Accounting → ACCOUNT → CLEAR

ACTION :

WE are currently performing a manual clearing within the Machinery account, where a debit amount is offset by a credit amount of the same value. Once you click Post, the system will close these two line items and change their status from 'Open' (Red) to 'Cleared' (Green).

The screenshot shows the SAP 'Clear G/L Account: Header Data' interface. At the top, there is a menu bar with 'Document', 'Edit', 'Goto', 'Settings', 'System', and 'Help'. Below the menu bar, the title 'Clear G/L Account: Header Data' is displayed. A green arrow points to the 'Process Open Items' button in the top navigation bar. The main form contains several input fields: 'House Bank' (empty), 'Account' (filled with '1000002'), 'Clearing Date' (filled with '2026.04.24'), 'Period' (filled with '4'), and 'Company Code' (filled with 'TEC1'). Below these fields, there are two sections: 'Open Item Selection' with a checkbox for 'Normal OI' (checked), and 'Additional Selections' with radio buttons for 'None', 'Amount', 'Document Number', 'Posting Date', 'Dunning Area', and 'Reference'. A 'Post' button is located at the bottom right of the form. The bottom of the screen shows a Windows taskbar with the date and time '6:35 PM 4/24/2026'.

16. Residual Items

MEANING : Using the Residual Item feature: This feature allows you to clear large documents and open a new document for the remaining difference.

TCODE- F-03

PATH : Financial Accounting → ACCOUNT → CLEAR

ACTION :

You can see a debit item of 20,000 and a credit item of 30,000-, leaving a difference of 10,000. In the Res.Items screen, you must enter the difference (10,000) into the field highlighted in red (Residual Items column). Once this amount is entered, the Not Assigned field at the bottom will become 0.00, enabling you to complete the posting.

17. PARTIAL PAYMENT

MEANING : This option is used when you want to pay or clear a "part" of the invoice amount without closing the original invoice. In this case, both the original document (invoice) and the partial payment document remain "Open" (marked in Red) in the account, linked together by the original invoice number. The items are only fully cleared

TCODE- F-03

PATH : Financial Accounting → ACCOUNT → CLEAR

ACTION :

An amount of 25,000.00 was entered in the Payment Amount column against the original debit entry of 60,000.00. The second line shows that the available payment amount is 25,000.00-. By entering the same value in the corresponding column, the transaction becomes technically balanced for this step. Notice that the Assigned field has become 0.00, as has the Difference Postings field, which means the system is now ready to post this partial payment.

Upon completing this process, the system will not close the original invoice. Instead, both the 60,000 and the 25,000 amounts will remain as **Open Items** (marked in Red), with a link indicating that the remaining balance to be settled is 35,000.

The screenshot shows the SAP G/L Account Line Item Display interface. The top bar includes the SAP logo and the title "G/L Account Line Item Display". Below the bar, there are navigation icons and a search field. The main content area is divided into three sections:

- G/L Account Selection:** This section contains input fields for "G/L account:" (value: 100016) and "Company code:" (value: TEC1). There are also "to:" fields and a "Search" icon.
- Selection Using Search Help:** This section includes a "Search Help ID:" field, a "Search String:" field, and a "Search Help" button.
- Line item selection:** This section contains a "Status" group with two radio buttons: "Open items" (selected) and "Cleared items". Below the radio buttons is an "Open at key date:" field with the value "2026.04.25".

At the bottom right of the main content area, there is a green arrow pointing to the "Execute" button.

- Difference between Partial Payment and Residual Item

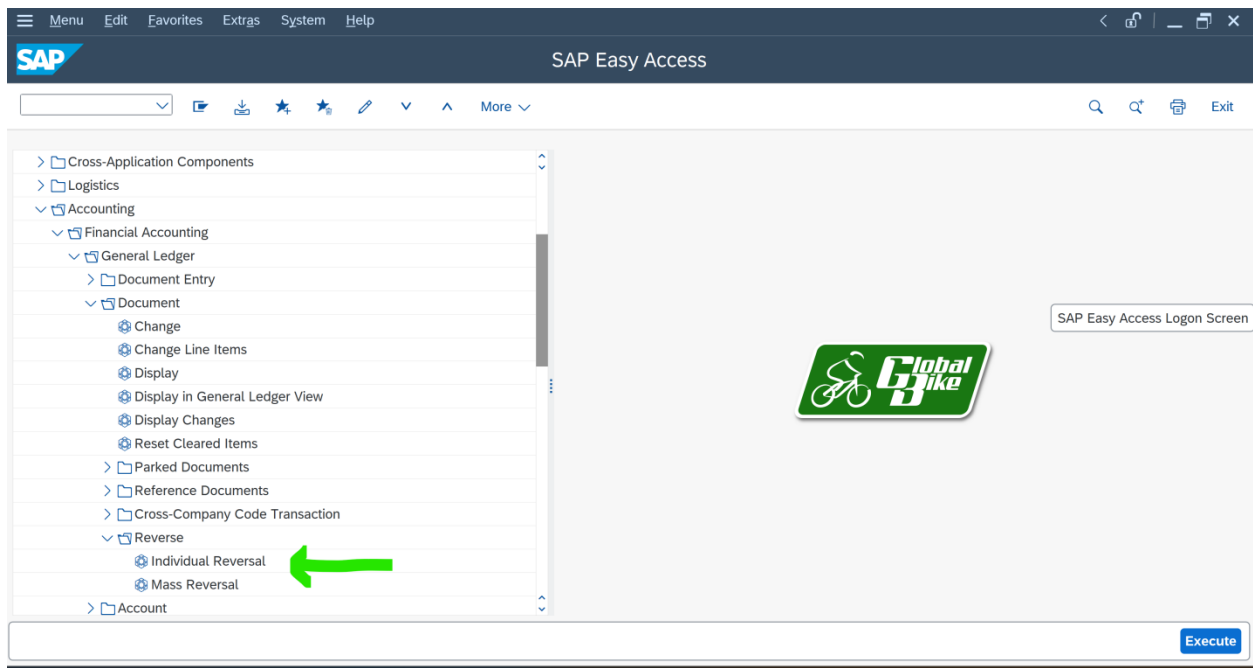

- **Residual Item** : The system completely clears the original (old) invoices and posts a new invoice for the remaining difference.
- **Partial Payment** : The system keeps the original invoices "Open" as they are but links them together. It shows that a portion has been paid while the rest remains outstanding. For example, the original invoice of 60k remains in the system, but its actual effective balance is reduced.

18. Individual Document Reversal

MEANING : is used to nullify the accounting impact of a specific posted document. The system generates a reversal entry that flips the debits and credits of the original transaction. If the document was part of a clearing process, you must first reset the clearing using FBRA before proceeding with the reversal.

19. Mass Reversal

- MEANING : This function is used to reverse multiple accounting documents simultaneously. It is highly efficient for correcting batch processing errors, such as incorrect payroll postings or depreciation runs for an entire company code.

20. Reset Cleared Items

- MEANING : When items are cleared, their status changes from "Open" (Red) to "Cleared" (Green). If a mistake occurs, you cannot reverse the documents directly. You must first "Reset" the clearing to return the items to their original "Open" status.

TCODE : FBRA

The screenshot displays the SAP 'Reset Cleared Items' (FBRA) transaction interface. The top bar includes the SAP logo and navigation options like 'Clearing', 'Edit', 'Goto', 'System', and 'Help'. Below the top bar, there's a breadcrumb trail: 'Accounts' > 'Items' > 'Accompanying Correspondence' > 'More'. The main area contains three input fields: 'Clearing Document' with the value '100032', 'Company Code' with 'TEC1', and 'Fiscal Year' which is empty. At the bottom right, there is a button labeled 'Reset cleared items' and a 'Cancel' button. A green arrow points to the 'Reset cleared items' button. The bottom of the screen shows a Windows taskbar with the date and time '9:20 AM 4/25/2026'.
